

To,  
**Australian High Commission**  
**New Delhi, India**

### GENUINE STATEMENT OF PURPOSE

I am submitting this statement of purpose with the genuine intention of pursuing my Diploma of Information Technology Networking commencing on **22<sup>nd</sup> April 2019** and Advance Diploma of Network Security starting on the **20<sup>th</sup> April 2020** from **Australian Harbour International College, Sydney, Australia**. It is my pleasure to stipulate my personal, academic details, relevancy of chosen course in my future along with future plans after completion of course. I would also like to assure Australian High Commission that I am genuine temporary entrant and will remain genuine temporary entrant if given an opportunity to gain international qualification from Australian Harbour International College which will be propitious for my future.

### INTRODUCTION

To initiate, I am **Akash K.C**; born to my mother, Mrs. **Samjhana KC** and my father, **Raju KC**; on the **27<sup>th</sup> April 2001**. I am Nepalese Citizen holding Nepalese passport with passport No11059312. I am originally from Bhimsengola, Kathmandu, Nepal. I am 17 years old but soon I will be 18 on the 27<sup>th</sup> April 2019. So, under Australian law, international students under 18 of age must have a guardian in Australia. So, I will be staying in **Meridian Homestay Services** under their supervision, at least till I reach 18.

To be honest, while I was growing up, I started to feel the Domination of Information Technology in the market. The tremendous growth of information Technology has got everyone attention in the world. Therefore, when I grew up, my attention changed into my passion. Because of my fascination I chose Management stream which also provide an opportunity to study computer science. I want to become more professional and more skilled in Information Technology, specializing in networking field but unfortunately I realized that the Nepalese education system is unable to provide global standard education. More importantly I want to competent enough in global market. So, I want to pursue my education in Australia to acquire international qualification that will make me an adroit professional in the field of IT.

### ACADEMIC ACHIEVEMENTS

Regarding academic profile, I have done my **schooling (10 years) from Surya Vinayak English Secondary School** and completed my School Leaving Certificate Examination in 2016. I have completed my latest qualification of intermediate in 2018 securing **2.69 CGPA** from **The Chand Bagh School**. I have been a hard working student since my school days and have never been fazed by unnecessary things. I also have self determination to do better and better in upcoming days too.

*Akash  
K.C.*

## ENGLISH PROFICIENCY

Regarding my English Proficiency, I have joined IELTS classes on the late October. Eventually, I appeared on the IELTS Examination held by British Council on the 29<sup>th</sup> September 2018. I have scored **overall band of 6.5**. In terms of English Proficiency I am eligible to get enrollment in Australia for my further education.

## FAMILY BACKGROUND

I live in joint family consisting of my mother (Mrs. Samjhana Karki), my brother (Anand K.C) maternal Grandfather (Mr. Ganesh Bahadur Karki) and my Grandmother (Mrs. Lal Kumari Karki). Growing up with grandparents is such a blessing because I have got lots of love from not only my mother but also from grandparents. To be honest mother (Mrs. Samjhana Karki) is everything for me as she is integral part of my life. She has not only raised me into proper man but also has fulfilled all the responsibility as mother and never made any compromises on my needs. All my family members are independent and employed except my brother. This also motivates me to become as successful and independent as them in my future. My mother has been working in Saundarya Health, Skin and Hair Solution as a Centre Manager as well as she is a business partnership in business named Ambuja Construction Pvt. Ltd. holding 30% share on annual profit. Similarly, my maternal grandfather (Mr. Ganesh Bahadur Karki) and my maternal grandmother (Mrs. Lal Kumari Karki) are working in Ani Nirman Sewa and Jyoti Unified Agriculture Firm as Junior Accountant and Sales Supervisor respectively. I found myself abundantly lucky having such a supporting and stable family living in harmony. We do bear good social status in our community and have no problem living decent life.

## WHY NOT HOME COUNTRY?

I love my family and home country immeasurably though I decided to study in abroad country for only one purpose and that is to gain international qualification from best education provider. Life without purpose is meaningless. I do have my own purpose to become an established IT professional in my home country so international qualification has high value for my career. Majority of students want to get further education from stellar educational providers irrespective of places. Likewise, I have taken my own decision not to pursue my education in home country considering different aspects of education in Nepal. There are numbers of private and government Institute which provides Information Technology in Bachelor programs unfortunately these institutes are not providing high quality education with sufficient training. In Nepal, there are four accredited universities such as Tribhuvan University (<https://tribhuvan-university.edu.np/>), Kathmandu University (<http://www.ku.edu.np/>), Pokhara University (<https://pu.edu.np/edu/>), Purbanchal University (<http://www.puexam.edu.np/>), and along with colleges such as Amrit Science Campus (<https://edusanjal.com/>), NIMST (<http://nimstcollege.edu.np/>), British College (<https://www.thebritishcollege.edu.np/>) and Saint Xavier ([www.collegesnepal](http://www.collegesnepal.com/)) but unfortunately available seat is limited. Moreover, lack of practical training is the main drawback in educational system of Nepal. Education should be a perfect blend of theory with practical which will provide solid ground for students for their careers. I found it majorly lacking in Nepal. The lopsidedness

*Academy*  
K.C

between theory and practical has made more students in Nepal unsure about their careers.

Though Information Technology course is also taught in Nepal but I don't wish to continue my further study in Nepal because of the following reasons:

- Education is theoretically driven which is not enough for students to get successful career.
- Limited number of seats for enrollment.
- Obsolete course structures.
- Graduates of Nepal can't compete with international graduates in global market.
- High demand of international graduates in multinational companies of Nepal.
- There is absolute lack of enough practical training in academic years.
- I can afford quality education from international education providers.
- Does not contain online teaching.
- Not a globally recognized degree.
- Lack of advanced technology.

So considering these facts I have to take major decision to leave Nepal for better education to secure my future in Nepal after returning back to Nepal with heavy knowledge that will qualify me for any workforce.

### **WHY AUSTRALIA?**

For every student it is actually very hard to make major decision for their careers. In fact, they have to choose major decision to build their career in solid ground. For this education plays an important role as it is a foundation upon which we build our future I am not hectic person rather I always take abundant time deciding each and every decisions. Therefore, deciding suitable country for my further education has taken my time and considerations. After numerous and intensive researches, I found Australia as most suitable destination for me. There are various factors that I have researched thoroughly such as educational and educational aspects including climates and others.

In terms of Education, Australia is stellar in providing high quality education. Around 1, 100 institutes in Australia have been providing around 22, 000 courses. 7 Australian universities have been listed in the top 100 of the QS World University Rankings. It is also second popular destination for international students for their further education. These are inciting factors for international student like me who is more interested in choosing best destinations for their education which will secure their career in future. Australia is forefront of new technologies therefore qualification from Australia in Information Technology networking and network security is something I can treasure most after returning to my home country too. Moreover, Australia is English speaking country so I thought it is relevant for me as I can easily communicate with native speakers as well others in Australia.

Generally, considering the living aspects Australia has affordable living expenses despite the high quality living standard. As it has 24. 6 million populations with natives from different countries such as India, Brazil, Nepal, Indonesia, China, Vietnam, Malaysia, Thailand and Republic of Korea, it has

Akash  
FC

created multicultural most country. This will put international students in an ease to soak up in multiple culture environment which also equally provides the opportunities to learn about different cultures. Similarly, there will have frequent cultural festive with different foods fests it will kind of give refreshment in new city during school breaks. Australia is also known as top ten happiest countries where majority of international students (83%) are satisfied with the education and living quality. One of the crucial factors to take into account is climatic condition. The hot summer and mild winter in Australia is mostly favorable for Asian so I can easily adapt in Australia.

Most important and auspicious initiatives for international students are that Australian government has introduced the different Acts and Rules for offshore students who are interested getting degree from Australia. The Education Services for Overseas Students (ESOS) Framework is introduced for protecting rights of international students willing to pursue their education in Australia. This gives us right to receive, before enrolling, current and accurate information about the courses, fees, modes of study, and other information from selected institution and institution's agent. Similarly, The Tuition Protection Service (TPS) which is included in ESOS Act is a placement and refund service for international students, if educational institutions are unable to provide student's interested courses. These initiatives of Australian government have given international students a better chance of getting high quality education without insecurities for future.

Therefore, after numerous researches on every aspects of Australia I found Australia as best education destination to vigor my knowledge more in my interest of field. In fact, I would get more technical skills with industrial based education and that is what I am going to treasure most after returning to Nepal.

### **WHY NOT OTHER COUNTRIES?**

I also researched about other countries like Germany, Japan, and China including other English speaking countries like US, UK, CANADA, and New Zealand but finally landed on Australia. I chose Australia instead of:

1. CANADA: Although Canada is one of the popular choices as education destination for international students, I believe for me its climatic condition would be difficult for me to coop with. Their weather condition is extreme cold with average temperature of -19.7 degree centigrade whereas the climate of Australia is almost same as in Nepal. Entry requirement and entrance process is very difficult and lengthy. Canada also has very less intake dates.
2. USA: In spite of being the first choice as education destination of most of the international students, the education in USA is very costly; if we do not get any scholarship or assistantship it will be hard for us to pay tuition fees. From living costs to tuition fees, the expenses are staggeringly high. In my case, it is after conversion the expenses are higher than that of Australia. USA has great value of education and the education system is well renowned all around the globe. But USA does not provide the Tuition fee Protection Scheme (TPS) and Overseas Student Health Cover (OSHC). Another aspect is that the crime rate in USA is very high. The climatic condition

*Alca's  
Jcc*

of USA is very different from Nepal and so is the time difference. Also each state in USA follows different curriculum of courses creating student of varying standard of education.

3. The countries like Germany, France, Japan where priority is given to their native language, the student have to take different language classes to study in their universities. Also it is not safe for international student as we can be misinterpreted there due to language gap.

Considering these factors, I excluded USA, Canada and other European and Asian countries as my educational destination.

### **WHY SYDNEY?**

Sydney is the state capital of New South Wales and the most populous city in Australia and Oceania located on Australia's east coast. Sydney is recommended by 88% international students as best educational destination which has shown the popularity of Sydney among international students. Similarly, it is ranked 9<sup>th</sup> best city for international students in the world; according to QS Best Student Cities 2018. Therefore more than 50, 000 international students come each year for their study. Not to mention the fact that it is center of World-class educational institutions (including Macquarie University, the University of New South Wales, the University of Sydney, the University of Technology Sydney and Western Sydney University) and currently Sydney has 5 universities in the QS World University Ranking, with the University of Sydney and the University of New South Wales in the global top 50. These facts have incited me more to choose Sydney for my better education. In fact, I will surely feel blessed to get international high quality education from Sydney.

Living in Sydney will give senses of security knowing Sydney is the world's second friendliest destination according to the Economist Intelligence Unit's 2016 global livability survey on 140 cities in the world. As the industrial hub, there would be good chance getting better opportunity of internship or job placement in a better firm in Sydney. Moreover, better transportation services are available in Sydney as there is numerous means of transportation available in smaller time frame.

While considering climatic aspects, Sydney enjoys a temperate climate with warm summers and mild winters. This climate is similar to that of my country and so will be easy for me to adapt there. That means there are lots of opportunities to go out and explore the city. Sydney is most diversified city as per the estimation in June 2012 by the City of Sydney, 40. 1% of the city's populations were born overseas. This will give us more exposure to multicultural environment and help adapt easily. Various interesting festivals and events in this multicultural city provide great chance to soak up global cultures. For recreational activities, students have no problem exploring the endless beaches, historic landmarks, award-winning recreational centers and other alluring places like Sydney Harbour Bridge, Darling Harbour, Sydney Opera House, Luna Park, Hyde Par and, Royal Botanic Garden.

As education has always been my first priority I have the aim to achieve internationally recognized qualification from the reputed Education Provider of Australia. That is why I have chosen AHIC for the further education which is located in Sydney.

*AHIC*

## WHY AUSTRALIAN HARBOUR INTERNATIONAL COLLEGE?

As I already mentioned about my passion towards Information Technology especially in networking, my interest starts to grow substantially with my age. After my schooling I made my mind to dedicate my knowledge in the field of IT networking. But the Education System of Nepal which is theoretically driven becomes only my hindrance to achieve my goal. Hence, I searched the relevant course of mine in websites of different colleges. I went to seek proper counseling from different educational consultancies and researched in various websites too. With lot of research, guidance from my seniors and relatives I shortlisted some of the well reputed institutes in Australia.

After the intensive researches and counseling on the educational provider of Australia I chose Australian Harbour International College as best for me. I went through the different websites of educational providers and compared the course structures, intake dates, tuition fees and other facilities of Australian Harbour International College (<http://ahic.edu.au/courses>) with Kingsford International Institute (<https://www.kii.edu.au>), Australia Institute of Business and Technology (<https://aibtglobal.edu.au/>), Vibe College (<http://www.vibecollege.edu.au/>), Australia Institute of Business and Technology (<https://aibtglobal.edu.au/>) and TMG College (<https://www.tmg.edu.au/>).

At last I preferred AHIC to pursue my Diploma of Information Technology Networking and Advance Diploma of Network Security. Australia Institute of Business and Technology offered Diploma and Advance Diploma of IT and is located in the heart of Sydney with affordable annual tuition fees (**22,000 AUDS**) and suitable course duration. But the offered courses are not suitable for me as comparison to AHIC, as there is no networking course available. The next option for VET course is **IIBIT** (<http://www.vet.iibit.edu.au>) which only provided the Advance Diploma of Computer System Technology with **16,800 AUDS** rather than Diploma of IT Networking and Advance Diploma of Network Security. Furthermore, as I was interested to study the VET courses because it gives the solid foundation to the students to vigor their knowledge in upper levels. As per my research I also found the VET education providers like Kingsford Institute, Vibe College and TMG but my interest to the Sydney is so intense that I excluded the **Vibe College (Brisbane)**, which only provides Advance Diploma Network Security without the Diploma of IT networking. **Kingsford International Institute** which is situated at Sydney unfortunately doesn't provide Diploma of IT networking and Advanced Diploma of network security that I passionately want to study to secure my future goal to become a network security analyst.

AHIC is centrally located in Sydney CBD, which makes transportation easier as there is a train station within 2 minutes of walk. From the counseling, I got adequate knowledge of internal factors of AHIC. AHIC has trainer from over 13 nationalities with international students from 35 different countries which has created diverse environment equally enhancing the learning with diverse teaching methods. Similarly, it is well facilitated with equipped lab. The provision of scholarship for well deserving students will certainly motivates the students to become best in the mass. Due to flexible class timetable, I can choose to take either morning or day or night classes with additional option to choose class day from Monday to Saturday as well. More importantly, the internship and placement facilities in AHIC also will help me to sharpen my knowledge for better career in future.

What I really loved about the AHIC is their explicit promise to provide high quality education with industrial experienced trainers who believe in multicultural environment which will enhance the students skill as they have opportunity to mingle in the new environment that also increases the interaction between the students which in turn make the ever students equally skillful. The small classroom sizes, industrial based training material, industry experienced academic team are some of the features that lured me to enroll in the **AHIC**.

Therefore, AHIC has been the first priority in my list of colleges from Australia which is affordable as well as more informative with effective education system and highly educated trainers. I am hopeful for AHIC to be the best education institution for international students like me to successfully achieve the future goals.

### **WHY VET COURSE (DIPLOMA AND ADVANCED DIPLOMA)?**

Although my academic background opens up many doors but I chose Diploma for me. This is because Australia has stellar reputation in providing the Vocational Education and Training. VET courses are known to focus more on providing practical and work-orientated occupational skills for one's professional career paths. Likewise, VET covers such a wide range of different courses and qualifications. Most VET courses are part of national training packages that are updated regularly in consultation with relevant industry bodies. Similarly, VET education system is more courses centric which deliver the course in dept with industry expert trainers on the field one is passionate about. As course lasts from 6 to 2 years with the less challenging course modules with emphasis on practical knowledge, it will help me pave path to join work force sooner.

More importantly, VET graduates achieve a higher employment rate than bachelor degree graduates. According to report of 2017, 78% of VET graduates are employed after training and getting works easily with high salaries than bachelor degree graduates. I found VET course suitable as it provides frequent intakes for studying; I don't have to waste my time more. So I find choosing VET course is one of the logical choices for my career.

### **HOW MY SELECTED COURSE PREVIOUSLY LINKED TO MY PREVIOUS STUDY?**

I am a person who is highly interested in the modern technologies and inventions. So I reckon the idea of choosing my career in the field of technology to be the best decision that I could take. Management, as a subject gave me a platform to gain more cognizance's regarding my aspirations. The substantial reason of me taking management in my high school was because it provided me opportunity to study computer science where I could work as a ladder towards my field of concern and to broaden my knowledge regarding the field of my career that is networking and network security. My thirst for knowledge about new technology taking place around me gave me cogent evidence that I ought to cull my career in the field of technology especially in the field of networking and network security.

*Adam  
fcc*

## WHY DIPLOMA OF INFORMATION TECHNOLOGY NETWORKING AND ADVANCE DIPLOMA OF NETWORK SECURITY?

Having much more interest in technology, I am looking forward to complete my **Diploma of Information Technology Networking leading to advanced diploma of Network Security in Australian Harbour International College**. I chose particularly this course because I want

There is a growing need of workers in IT sector in Nepal, too. In today's world lots of piracy and much useful information are being spread due to the poor network security. Various websites in Nepal are easily hacked by some hackers and data also can be easily accessed as a result of a poor security. Network security is much more important in our market as there are loss of data and information that is important to us. Many network security threats today are spread over the Internet. The most common include: Viruses, worms, and Trojan horses Spyware. Network security helps protect customer's data; it reduces the risk of legal action from data theft. Ultimately, network security helps protect a business's reputation, which is one of its most important assets. So, lots of damage and maintenance can be done with the study of network security. Therefore, keeping in mind the various Network security issues I want to be a professional network security specialist in my country. This course will teach me ethical hacking, help me fulfill my aim of being Network Security Analyst and graduates me for a fully professional career in the field of IT networking. I will be studying specialization in Network security which is mostly industry focused course. The course structure in Australian Harbour International College both in diploma of information technology networking and advanced diploma in network security are precisely organized for contributing adequate facts, information, and skills to the pupil qualifying them to be globally proficient.

## COURSE STRUCTURE

I have researched thoroughly about the course content of Diploma of information Technology networking and Advanced Diploma of Network Security in Australian Harbour International College from website (<http://ahic.edu.au/c>). I found the first year Diploma of IT Networking consists of total 18 units among which 11 are elective units remaining 7 are core units whereas Second year Advance Diploma of Network Security consists of total 14 units among which 7 are electives and remaining 7 are core units.

**Name: Diploma of Information Technology Networking**

**Duration: 52 Weeks (36 study weeks)**

## ELECTIVE UNITS

S.N	UNIT CODE	UNIT NAMES
	ICTNWK509	Design and implement a security perimeter for ICT networks
	ICTTEN516	Produce technical solutions from business specifications
	ICTNWK525	Configure an enterprise virtual computing environment
	ICTNWK505	Design, build and test a network server
	ICTNWK503	Install and maintain valid authentication processes

	BSBSUS501	Develop workplace policy and procedures for sustainability
	ICTSAS505	Review and update disaster recovery and contingency plans
	ICTTEN422	Configure and troubleshoot advanced network switching
	ICTNWK524	Install and configure network access storage devices
	ICTNWK531	Configure an internet gateway
	ICTNWK511	Manage network security

### **CORE UNITS**

S.N	UNIT CODES	UNIT NAMES
	ICTICT418	Contribute to copyright, ethics and privacy in an ICT environment
	ICTICT511	Match ICT needs with the strategic direction of the enterprise
	ICTNWK529	Install and manage complex ICT networks
	ICTSUS501	Implement server virtualization for a sustainable ICT system
	ICTTEN611	Produce an ICT network architecture design
	ICTICT418	Contribute to copyright, ethics and privacy in an ICT environment
	ICTICT511	Match ICT needs with the strategic direction of the enterprise

**Course Name: Advance Diploma of Network Security**

**CRICOS Code: 095651A**

**Duration: 52 weeks (36 study weeks)**

### **ELECTIVES UNITS**

S.N	UNIT CODES	UNIT NAMES
1.	ICTNWK608	Configure network devices for a secure network infrastructure
2.	ICTNWK609	Configure and manage intrusion prevention system on network sensors
3.	ICTNWK613	Develop plans to manage structured troubleshooting process of enterprise networks
4.	ICTNWK615	Design and configure desktop virtualization
5.	ICTTEN811	Evaluate and apply network security
6.	ICTTEN611	Produce an ICT network architecture design(Diploma Level)
7.	ICTSUS501	Implement server virtualization for a sustainable ICT system(Diploma Level)

### **CORE UNITS**

S.N	UNIT CODES	UNIT NAMES
1.	ICTNWK502	Implement secure encryption technologies

*Adam  
K.C.*

2.	ICTNWK509	Design and implement a security perimeter for ICT networks
3.	ICTNWK601	Design and implement a security system
4.	ICTNWK602	Plan, configure and test advanced server based security
5.	ICTSUS601	Integrate sustainability in ICT planning and design projects
6.	ICTNWK502	Implement secure encryption technologies
7.	ICTNWK509	Design and implement a security perimeter for ICT networks

The course structure included in the Diploma of Information Technology Networking and Advance Diploma of Network Security in AHIC has very high significance in my career as I have long term vision to establish myself as network Security Specialist. The course delivered is solely focused on managing networks, maintaining the integrity and confidentiality of a company's data and information systems. The course structures are favorable in long term for my career as I am looking forward to become network security specialist in future in my home country.

### FUTUTRE PLAN AFTER COMPLETION OF COURSE

I have already mentioned my inner desired to get established as ICT network Specialist in my own home country. The high quality education that I am seeking from Australia will obviously assist me in my career. We know this is the era of Information Technology; the scope of networking and network security is beginning to get wider and wider. In Nepal, the multinational organizations and every sector are feeling the importance of IT networking and network security. In broader sense, the qualification from Australia will be extremely beneficial for me after returning back to Nepal.

After completing my course Diploma of Information Technology Networking and Advance Diploma of Network Security, I have no intention to prolong my stay in Australia as I have my own plan in my homeland to get establish in IT sector. So, soon after returning back to my country I will apply in renowned ICT companies of Nepal such as Ncell ([www.ncell.axiata.com](http://www.ncell.axiata.com)), Subisu (<http://subisu.net.np/>), Vianet (<https://www.vianet.com.np/>), Smart Telecom(<https://www.smarttel.com.np/>), Cloud Tech (<http://cloudtech.com.np/>), <https://broadlink.com.np/>), Deer Walk (<https://www.deerwalk.com/careers>), Frisk Information Technology Pvt. Ltd. Java Software B.V, and Fl Soft (<http://www.flsoft.com/>) etc. The course content of Diploma of Information Technology Networking and Advance Diploma of Network Security in AHIC will definitely equip me with enough knowledge and training in managing networks as well as responding the threats for network security. The adequate training I gain from AHIC will be so much valuable if I can utilize in my real workforce. So, the real deal is using my knowledge and training in righteous way and for that I have to work more and ripen my knowledge more so I can deal with complexity in network security. I will start my career as network security specialist in renowned ICT companies as there is ever-growing demand of IT professional. Due to poor network security hacking has been increasing along with data accessing. Many network security threats like Viruses, worms, and Trojan horses Spyware exist on the internet. So, I am determined become that adroit Network Security Specialist who is able to respond to any threats and monitor networks with the skills of implementation of safeguard. For skilled ICT Network specialists the incentives provided are also high not less than NRs. 60, 000 per month. Working in reputed ICT companies of Nepal as

mentioned above will not only provide good reputation in society but also provide me adequate remuneration for decent living in Nepal. I will be looking for the job vacancies at [www.merjob.com](http://www.merjob.com), [www.kantipurjobs.com](http://www.kantipurjobs.com), and other websites for gaining a better position. Some of them are for; IT system and network Administrator in Dolphin Dive Technology (<https://merjob.com/systems-administrator/>); Core Network product manager in ZTE Corporation (<https://merjob.com/core-network-product-manager-2/>); Network/Security Administrator, officer- information Security and System Administrator in a financial institution (<https://www.jobsnepal.com/job/office-assistant-officer-information-security-network-securityadministrator-system-administrato/113434>), etc.

As I am more focused to become network security specialist, I will put my all efforts to acquire knowledge and skills in depth from the deliberation of experienced professors and through the use of modern teaching methodology along with advanced experimental laboratory of AHIC. I will prepare myself and build my confidence to work independently even under adverse environment with VET based Australian qualification. More importantly, I will focus on monitoring networks, responding to threats, design and implement safeguards, communicate Security issues to management, ethical hacking, research emerging threats so I will be able to fulfill responsibilities as network security specialist.

This way, I have set my target that after getting an Australian qualification, I will come back to my country to earn my career reputation. Moreover, I will be coming back to my country for my family as I cannot live without them for longer period.

### **ASSURANCE TO RETURN TO HOME COUNTRY**

With an obvious assurance, I want to mention that my purpose to be in Australia is only to get quality education from globally recognized institution so I can invest my knowledge in own Nepal for better future. I love my family as well as my country indefinitely. My family has always supported me in every steps of my life and their support is my strength to continue my study in Australia as well. Honestly, whatever success I will get in future it will directly reflect my parent's hard works. So, after completion of my course in Australia I will return to establish my career in Nepal while living with my own family. The friends and family in my home country means a lot to be me as I born in Nepal, grew up smelling fresh damp soil and I will miss not only miss my family but also miss living in Nepal. I will also have to take care of my parents and manage their property of AUD 200, 728.19. Therefore, I will be returning in my home country immediately after my course completion.

Likewise achieving something in my own country through hard endeavors will give some sheer pleasure as whether it's small I will be added as technical manpower of my country. I am confident that international qualification from Australia will give a solid platform to start my career in Nepal with adequate remuneration for decent living and fulfilling my own goals following my passion. I have my dream to work in renowned ICT Companies of Nepal like Ncell ([www.ncell.axiata.com](http://www.ncell.axiata.com)), Subisu (<http://subisu.net.np/>), Vianet (<https://www.vianet.com.np/>), Smart Telecom (<https://www.smarttel.com.np/>), Broadlink (<https://broadlink.com.np/>) etc. Getting chance to work in

*Arash*  
*kc*

these famous ICT companies will surely give me some true satisfaction for proper utilization of International qualification.

My future goal is to contribute something whether it is small or huge for my own country in Information Technology and Networking field and to achieve that goal I must return.

### **FINACIAL ARRANGEMENTS**

My entire family is sponsoring for my education in Australia. My mother (Samjhana Kaki) has made sure of providing me high quality education for my wellbeing and career from the beginning and she is too supporting the idea of abroad study for my secure career in Nepal. Financially, my parents have enough to cover my study and living expenses in Australia. My mother has her 30% share on business (PAN No 604359085) named Ambuja Construction Pvt. Ltd which earns her **NRs. 13, 71,150.00** annually. Similarly, she is earning **NRs. 5, 79,840.00** as a center Manager. My Maternal grandfather (Ganesh Bahadur Karki) and Maternal Grandmother (Lal Kumari Karki) are annually earning **NRs. 3, 00,000.00** and **NRs. 2, 64,000.00** respectively. On this accounts we have a total annual income of **NRs. 25, 14,990.00** which is equivalent to **AUD\$ 30,900.47** at the exchange rate of **1 AUD\$= 81.39 NRs.** Additionally, we have a bank balance of **NRs 3,519,686.68** which is equivalent to **AUD\$ 42,375.23** at the exchange rate of **1 AUD\$ =83.06** in Nabil Bank Limited, Kathmandu, Nepal. This financial declaration clearly reveals I am economically well enough to study in Australia. There will be no financial hindrance for my education and living arrangements during my educational stay in Australia.

### **STUDENT VISA CONDITION SUB CLASS 500**

I am fully aware of student visa condition sub class 500. So, would like to assure Australian High Commission that I will follow all these rules and regulations including the rules AHIC during my stay in Australia as I only have my focus on getting further education from renowned educational institute of Australia.

### **CONCLUSION**

As per my final words, I am a very passionate student with self-confidence and I believe I have no such invalid reasons and purpose for applying in Australia. I have genuinely presented my interest for applying in Australia that is to accomplish my ultimate goal to become successful in IT field. I am very much positive that international qualification will put me one step ahead to achieve my ambition. The international qualification from Australia has high value in Nepal as there is extreme demand of the adroit ICT professionals. Especially, in ICT networking, the demand of highly skilled network security analysts who have high responsibility in securing and managing networks along with the implementation of proper applications for securing networks are increasing in Nepal in every organization as well in governmental organization. So, the high quality education from Australia is definitely going to help numerously. I sincerely request respected visa officer to provide me an opportunity to pursue my study in Australian Harbour International College after scrutiny my statement of purpose with my prospective and assure I will make difference in choosing AHIC with

my hard endeavors. I am very hopeful to get a positive response which will definitely favor me in future for not only acquiring international qualification but also for fulfilling my goal. Thank you for your consideration. Looking forward to hearing from you.

**Sincerely Yours,**
